INTRO: Why probability tracing?

What makes it a tricky problem?

Why ray tracing is flawed

A better 4D grid tracer?

Probability vs. reachability

My solution strategy

SOLUTION I: Continuous firing problem

A new problem: non-continuous firing in phase space

Parabolic approaches beat ellipses and hyperbolas: Oberth-efficiency

Low-energy transfers: 3-body model - effective potential - Coriolis force - zero-velocity curves

Lagrange points - periodic orbits - manifolds

Manifold hopping - weak stability boundaries

Interplanetary transport network - bifurcations of periodic orbits (Halo, Lyapunov, etc.)

SOLUTION II: Non-continuous firing problem
