pull all the bolts out of the bell housing

pull the bell housing

pull the gasket off

remove that snap ring

pull our rear extension housing out

lift this planetary assembly out

pull our c4 clutches out

grab our top pressure plate

pull our pressure manifold switch in this tube

drill a hole in here for the c3 oiler

increase the oiling to the c3

grab our c1 c2 clutch drum

pull the seat tool clutch hub out

remove your spiral lock

pull a whole drum assembly out

remove all the seals

assemble a c1 c2 clutch drum

lube everything up with trans fluid

start stacking clutches on the input shaft

put this shaft in the drum assembly

follow the instructions for the clutch clearance

set the clutch clearance

soak the clutches for a half hour

start with the external spline

strip the rest of this valve out

take the apply piston out of the back

lubed up the inside of our bore here on our transmission case

run the feeler gauge between the bottom of the pressure plate

drop the bell housing

drop all our bolts

put all the bolts with the o-rings

torque all the bolts

build this clutch pack back up closer to our pressure plate

drop our sun gear down inside the case

put trans gel on here on four sides

drop our back pressure plate

got our new rear output bearing in place

moving on to the valve body

filters the fluid in the valve body
finish stripping this valve body down
pull a solenoid
get rid of the old springs
reinstall our solenoids
shift the trans up
finish up hooking up our pan harness and finish up the strands at this point
pull these two retaining clips back out
drop our pan gasket
